**IRSMEA/MISC/2005**

**Dated 6.12.05**

The Chief Mechanical Engineers  
All Indian Railways (Open Line)  
Production Units

Director,  
IRMEEE, Jamalpur

Executive Director,  
CAMTECH, Gwalior

Indian Railway is a vibrant organization consisting of many engineering and other disciplines. Development, manufacture, operation and maintenance of rolling stock remain a key technological challenge and many milestones have been achieved in the history of Indian Railways through hard work and devotion of mechanical engineers. Communication of new ideas and dissemination of knowledge - both technical and managerial - is a major factor binding the like minded people together.

To achieve the goal of improved communication IRSME Association is publishing an annual journal. Inaugural issue shall be published in the month of January, 2006. The publication shall include articles covering issues concerning the mechanical engineering discipline in particular and Railways in general. Achievements of individuals and organizations, new technology issues in changing perspective and future challenges to the mechanical engineers- are some of the desirable themes. Articles, statistics, snippets, anecdotes are all welcome. Also welcome are advertisements to take care of expenses.

Kindly circulate this information among all members of the Mechanical Department - staff, supervisors and officers- and arrange to forward suitable material for publication to the undersigned by 20<sup>th</sup> Dec'05.

**(D. C. Sharma)**  
**Director Mech. Engg.(Chg) /Railway Board**  
**& Secretary, IRSME Association**
